EDUCATION

Master in Computer Application, BVIMIT Navi Mumbai — Jul 2025 - Present
Relevant Coursework: Advanced Java, Advanced DBMS, Natural Language Processing, Machine Learning, DevOps Cyber Security, Artificial Intelligence.

Bachelor of Science (Computer Science), SIES Nerul — Aug 2020 - Jul 2023
Relevant Coursework: Data Science, Ethical Hacking, Cloud Computing, Information Retrieval, Artificial Intelligence, Software Testing and Quality Assurance, Web Services, Database Management System.

TECHNICAL SKILLS TECHNOLOGIES

Programming:	Java, Python, C#, SQL
Web Development:	Frontend and Backend Development (React, Next.js, Spring Boot, Flask)
Data Analytics	Data Processing, Basic NLP, Business Intelligence Tools
Tools and Platforms:	Git, Airtable, Zapier, Github
Databases and Systems:	PostgreSQL, MongoDB
Containerization:	Docker

PROFESSIONAL EXPERIENCE

Digital Solution Intern, CHESS — Feb 2024 – Feb 2025
Thane, Maharashtra

- Developed the company website using the Odoo CMS platform, enhancing service visibility and user engagement, leading to a **152%** increase in traffic post-launch, with an average visit duration of **31** seconds.
- Created a comprehensive company profile to effectively communicate key information to clients, strengthening the company's branding.
- Managing content across social media platforms like Instagram, Facebook, and LinkedIn, focusing on the company domain topics, recent projects, and success stories. Utilized automation tools to boost customer interaction, achieving an **80%** increase in post impressions.

KEY PROJECTS

Manthan 2026 - Full-Stack Tech Fest Website *Next.js 14, TypeScript, Supabase, Razorpay, Tailwind CSS*

- Engineered a production-ready web platform for a college tech fest, covering event discovery, payments, and digital pass delivery.
- Built secure backend APIs for Razorpay order flow, signature verification, and QR-based ticket generation with robust server-side validation.
- Developed an admin dashboard with real-time operational features including check-in management, analytics, cash-payment handling, and CSV exports.
- Designed and optimized PostgreSQL data workflows on Supabase using RLS policies, indexed views, and scalable schema updates.

Pricent - Grocery Price Intelligence Platform (In Progress) *FastAPI, React, SQLAlchemy, Redis, Celery*

- Building a full-stack platform to compare grocery prices across Blinkit, BigBasket, Zepto, Instamart, and JioMart.
- Implemented secure two-step search (*hints* $\rightarrow \rightarrow$ signed token $\rightarrow \rightarrow$ *cards*) with backward-compatible APIs.
- Developed concurrent scraping with caching and fallback logic for reliable results under source instability.
- Added flash-deal tracking, price-history APIs, watchlists, and Telegram/Web Push notifications.
- Improved backend security and deployment readiness using JWT auth, rate limiting, validation, and Docker setup.

Memorai - AI-Powered Personal Knowledge Archive *React 18, TypeScript, Vite, Supabase, Gemini API, Tailwind CSS, Chrome Extension (MV3)*

- Engineered a full-stack platform for saving, organizing, and rediscovering web resources with category-based management, favorites, reminders, and multi-view browsing.
- Built secure serverless APIs for AI semantic search and extension-driven save flows, with input validation, CORS handling, secret-based authorization, and resilient response parsing.
- Developed intelligent discovery features including hybrid fuzzy+semantic retrieval (Levenshtein, phonetic matching, weighted ranking), personalized spelling suggestions, and related-content recommendations.
- Designed Supabase PostgreSQL workflows with authentication, real-time sync, category auto-provisioning, and user-isolated data access enforced through robust Row Level Security (RLS) policies.

ACADEMIC RECOGNITION & ACTIVITIES

- Received a Letter of Appreciation from SIES (Autonomous), Nerul (Aug 2023) for delivering an engaging project guidance session to Computer Science students, sharing practical insights on topic selection, project planning, coding best practices, and collaborative execution.
- Delivered academic presentations including Twitter Marketing (Digital Marketing curriculum), a Spring Boot–based backend group project, and a Data Structures & Algorithms project focused on Priority Queue implementation.
